

WCI SAS

Water Consulting International

Water Consulting International is the outcome of almost 40 years of supply of equipment for water supply networks worldwide, in particular Africa.

Under the name of **Boranex** for 1980-1990 decades, then as **International Procurement Services (IPS)** in the years 2000, the same team now runs **Water Consulting International (WCI)**, with the same commitment of quality of service and optimization of procurement.

In addition to the traditional activity of supplier of packages, we have developed a new dimension of Consulting towards international Contractors and water networks Utilities.

WCI now offers to the client's our procurement experience and a strong knowledge of the industrial fabric in our field of activity.

WCI can provide relevant technical support, as well as a valuable optimization for procurement of hydraulic equipment.

WCI Scope of Activity :

Water and Sanitation Infrastructures Worldwide

Intakes, wells, pumping stations, treatment plants, water supply networks

Sewerage, rainwater networks, sewerage pumping stations,
waste water treatment plants
